

## PRESS RELEASE

# RENAULT: THE ELECTRIC OFFENSIVE

Boulogne-Billancourt (France), March 2, 2020 -

**Renault launches its electric offensive with the widest choice of electric and electrified models, while preparing for the future:**

- **E-TECH** an innovative and revolutionary range of hybrid and plug-in hybrid engines on **New Clio, New Captur and New Mégane Estate**.
- **New Twingo Z.E.**, the queen of the city also goes 100% electric.
- **New ZOE** proposes the **Riviera limited edition**.
- **MORPHOZ electric concept car**, Renault is inventing the future of family mobility, adaptable to the changing needs of everyday life and integrated into the electric ecosystem.

## A FULL ELECTRIC AND ELECTRIFIED RANGE FOR EVERYONE

- **A revolutionary new hybrid and plug-in hybrid technology on New Clio E-TECH, New Captur E-TECH Plug-in and New Mégane Estate E-TECH Plug-in**

Renault is drawing on its expertise in electric vehicles for more than 10 years and its Formula 1 experience to offer the widest range of electrified vehicles, thanks to the launch of an innovative and revolutionary range of hybrid and plug-in hybrid powertrains called E-TECH on three of its flagship models at the heart of the market: New Clio, New Captur and New Mégane.

- **New TWINGO Z.E.: Renault's iconic small city car, 100% electric**

Renault launches an electrified range with eight vehicles, including the **New Twingo Z.E.**

Twingo Z.E. capitalizes on the iconic status and popularity of Twingo, the historic A-segment leader on the French market and the fourth best-selling minivan in Europe. Designed with electricity in mind, Twingo Z.E. retains all the modularity that has made its sister model so successful in terms of thermal engines. Its dimensions remain unchanged and its record-breaking turning radius of 4.30m ensures optimum city handling.

Equipped with the new R80 engine developing 60kW (82hp), Twingo Z.E. emphasizes driving pleasure thanks to three adjustable levels of regenerative braking. The 22kWh battery enables Twingo Z.E. to

travel up to 180km on a full WLTP cycle and 250km on a WLTP City cycle. Twingo Z.E.'s Cameleon charger gives it great recharging flexibility and ensures that it recovers up to 80km in just 30 minutes when charged on a 22kW power terminal.

With Twingo Z.E., Renault's iconic small city car is now available in 100% electric version. Fun and easy to live with, its sparkling personality blossoms fully on its favourite playground... Electricity makes Twingo the queen of the city more than ever!

## **MORPHOZ, TOMORROW'S EV ADAPTING TO EVERYDAY LIFE**

Renault keeps its pioneering spirit and offers a vehicle that physically adapts to the different needs of families.

**Electric:** a new modular CMF-EV platform from the Alliance, with new perspectives in terms of design, space, comfort and life on board.

**Modular:** a vehicle that can be adapted to users' needs, integrating car-sharing functions.

**Connected:** MORPHOZ is equipped with artificial intelligence, a real virtual personal assistant.

**Autonomous:** MORPHOZ is equipped with a level 3 autonomous driving module and communicates with its environment.

**Integrated:** As a link in a virtuous and intelligent electrical ecosystem, MORPHOZ supports and accelerates the energy transition.

**Forerunner:** MORPHOZ prefigures a future new family of electric vehicles from Renault
