Renault unveils Alaskan ICE Edition, a show car with an enhanced design that announces a limited series that will be available from September

- Renault Alaskan ICE Edition, in its glacier white colour, contrasts with black and red exterior strippings. Alaskan ICE Edition is equipped with **an exclusive two-tone hard-top design** to increase storage volume and protect the load, and **black style side bars**. Black 18" aluminum wheels, wing surrounds and off-road tires reinforce its imposing and robust design. Inside, the audio-focal system provides enhanced sound quality with 6 stereo Focal speakers.
- Renault Alaskan still stands out for its **muscular design**, with an energetic front end and athletic lines, and its **2.3-litre Renault dCi engine, the most fuel-efficient and economical** in its segment.
- With Alaskan, a professional benefits from a generous bucket (2.5m²), **a payload of more than 1 tonne**, an exceptional **towing capacity of 3.5 tonnes** and formidable off-road capabilities. The interior space offers 5 spacious and comfortable places.
- Alaskan benefits from the capillarity and expertise of **the Renault network in Europe** (nearly 9,000 points of sale) and the strength of **the Renault Pro+ network** (nearly 500 centres in Europe) to meet the specific expectations of professional customers.
- Switzerland will be the first country to market this limited edition Alaskan ICE Edition. Alaskan has been on the European market since September 2017.
